## job costing software

Posted by lantana - 2007/08/27 09:26

---

I am looking for a recommendation for Job Costing software that interfaces with Quickbooks.

Anyone have any recomendations? :?:

If you are interested in good, unbiased reviews of construction software packages, you can check out [ctsguides.com/construction.asp](http://ctsguides.com/construction.asp)

Their downloadable free reviews include a phone consult with their president, who has been reviewing construction software for more than 20 years. Good stuff here!
